Our Vision

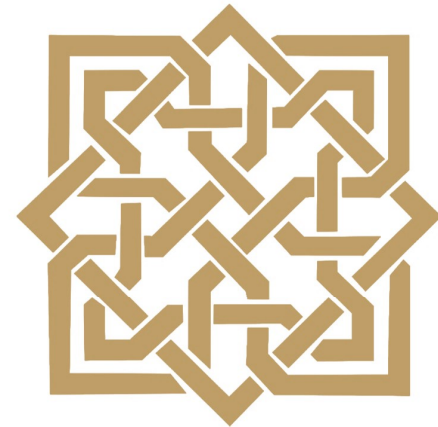

Provide superior education in the integration and development of Islamic studies and science for civilization.

Our Mission

1. To integrate and develop Islamic Studies, science, and Indonesianness in education and teaching.
2. To develop a culture of ijtihad in multidisciplinary research that is beneficial for both academic and community needs.
3. To increase the institutional role in solving national issues, based in Islamic and scientific insight for a civil society realization.
4. To build trust and develop cooperative partnerships with a number of parties to lead to better implementation of the Three Principles of Higher Education.

CORE VALUES

Integrative - Interconnective | Dedicated - Innovative | Inclusive - Continuous Improvementment

Greetings from the *Rector*

Indonesia has now faced the industrial revolution 4.0. Having committed to take part in the global competition, Indonesians have to prepare themselves as soon as possible, particularly in facing the revolution. The dark part of Indonesian history as a victim in the former industrial revolution must not be there anymore. After having the so-called golden age, Muslims broke into pieces owing to the revolution. It resulted from the distance they made between religious and "secular" science. Religion experts were absent in the development of science and technology.

Responding to such phenomenon, Sunan Kalijaga Yogyakarta State Islamic University (UIN SUKA) commits to prepare a solid and strong generation. A generation that puts religious and scientific ethic and works in harmony, equipped with soft and hard skill needed in facing the fourth revolution. Indonesia must not fail. The university produces experts in religion and, at the same time, biology, psychology, engineering and even politics who will take part in developing the world with an extensive insight and international capacity.

UIN SUKA, in the process achieving world class university, is having great number of facility, agenda, and international standard technology. The university has been continuously improving its human resource and student quality, by holding, for example, international collaboration that enables them to have global insight and exposure. Works and achievement of the academic member of the university have been published and recognized internationally. Having all these, in 2015 UIN SUKA got international recognition with ISO certificate 900:2015 from TUV Rheinland Germany.

The rector of the university has also been elected to be the President of Asian Islamic Universities Association for 2017-2019 term. In addition to that, the university gets A for institutional accreditation from BAN-PT. Industrial revolution 4.0, thus, must not be something to worry about, at all.

Come and join us in Sunan Kalijaga Yogyakarta State Islamic University. Together we produce a strong and solid generation integrating and interconnecting religious and scientific discipline. We prove that Indonesia has a generation that will win this revolution.

Prof. Dr. Phil. Al Makin, S.Ag., M.A.

Prof. Dr. Iswandi Syahputra, S.Ag., M.Si.

Vice Rector for Academic Affairs
and Institutional Development

UIN SUKA explained

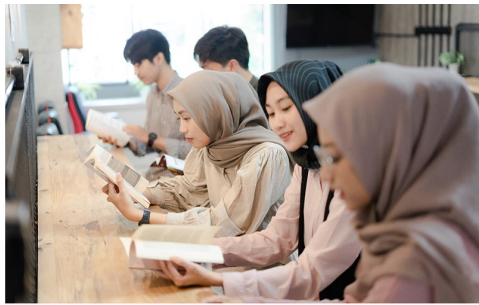

Sunan Kalijaga Yogyakarta State Islamic University (UIN SUKA) offers an integrative-interconnective educational model with a cohesive system in academic, management, cooperation, and entrepreneurship improvement; dedicative-innovative through living dedicative, incredible, active, creative, and innovative attitude;

in addition to routine and meticulous work ethic; inclusive-continuous improvement that includes open, accountable, and commitment towards change and continuity.

UIN SUKA has 41 departement for bachelor level in 8 Faculties, 15 departement for master and 4 doctoral programs in either Graduate School and Faculties.

The civitas academica of the UIN SUKA prioritize the excellent academic process that enables students to get high achievement. Included in this point are the highly qualified academic resources having professorship and doctoral degree from both in and outside the country.

Teaching Staff

Our teaching staff includes full Professors, Associate Professors, as well as lecturers who have achieved doctoral and master's degrees from leading universities of both national and international programs.

UIN-SUKA has earned a reputation for developing the paradigm of "integration-interconnection" by integrating both religious and general fields of studies. Maintaining high academic standards, UIN SUKA becomes a member of AUN-QA Network as its quality assurance, and is the reference in Islamic Studies. Developing its national and international reputation, the University set its goal of becoming a research-oriented "World Class University in Islamic Studies".

Appropriate facilities and infrastructure is one of the important factors that can support a successful learning outcome. UIN SUKA keeps going forward to ensure the quality of facilities and infrastructures which will be continuously improved.

Academic Calendar

Indonesia's Inclusive Campus

UIN SUKA received the Inclusive Education Award from the Department of Education and Culture on November 18th, 2013.

This award demonstrates the university's commitment as one of the pioneering inclusive campuses in Indonesia.

The award recognizes UIN SUKA longstanding initiative to fight for the creation of an inclusive educational system, not only at the post-secondary level, but also at the primary level.

Emotionally bonded friends at any situation will construct a harmony and supportive environment.

Unity in Diversity

UIN SUKA has committed to be an inclusive university, providing equal chance and opportunity for prospective students in throughout Indonesia and beyond, regardless of cultural, ethnic, and racial background, including those with different ability (difabel).

By doing so, UIN SUKA has made itself "fort of the bhineka (plurality)" in terms of the way of thinking, living, being religious follower, community member, and citizen.
